

LOGIC GAS FIRES

AND CLASSIC FIREPLACES

Logic HE Conventional flue fire with Coal-effect fuel bed, shown with Polished Chrome-effect Wave front and Polished Steel-effect Box Profil2 frame, with slide control. Also shown: Grey Brompton mantel from Stovax.

A Warm Welcome

Relax... It's a Gazco fire!

Designed to warm the very heart of your home, a Gazco Inset Gas Fire brings you the promise of cosy comfort throughout those long winter nights; even if you don't have a chimney!

Whether you want to achieve an up-to-the-minute, contemporary look or have your heart set on a more traditionally-designed fire, you will find a choice of highly-realistic flame effects and elegant frame options to suit your decorative style and budget.

Each model has been specially developed with ease of installation in mind, giving you excellent value for money through reduced fitting costs – and in most cases, you do not have to have a wall or floor vent installed either. For more information, or to view our complete range of Gas & Electric fires and stoves, simply visit www.gazco.com.

The Gazco pedigree

Gazco's UK research and development laboratories are amongst the most advanced in the world, and quality and technology are assured when you choose a Gazco Inset Fire.

Gazco is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all fires in this brochure bearing both the UKCA and CE mark. Similarly, our environmental management systems ensure we work in a sustainable manner, whilst endeavouring to protect the environment by minimising any possible impact from our operations.

With over 40 years of proven experience building quality Gas fires, you can be confident that when you select a Gazco fire, you are getting the best of British design, engineering and manufacturing.

Front Cover Image: Logic HE Conventional flue fire with Log-effect fuel bed, shown with Arts front in Polished Chrome-effect and Polished Steel-effect Box Profil2 frame. Also shown: Pembroke mantel in Warm White.

We are proud to have been recognised as an award-winning manufacturer, for our high-quality products and innovative technology. Find out more at gazco.com/awards

Peace of Mind...

Expert Retailer Network

We take great care to ensure that our fires are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your fire.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home.

These retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable

levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Gazco fires purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at www.gazco.com.

Find Your Retailer

You can find your nearest retailer by visiting:
www.gazco.com/retailers

Extended Warranty

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be extended to a Five Year Warranty provided it is registered with Gazco. Please note, these warranties exclude certain consumable parts. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard one year non-extendable warranty, or minimum statutory warranty for your country. Full warranty terms and conditions are available to view at www.gazco.com.

WIN the cost of your product back!

by registering your product online for your free extended warranty. See page 43 for more details.

† ODS (Oxygen Depletion Sensor) - This safety feature will shut off the gas supply to the burner in the event of a reduction to oxygen levels in the room (conventional flue only).

*Not available to Logic HE Balanced Flue Coal-effect

Image left: Logic HE Conventional flue fire with Log-effect fuel bed, shown with **Tempo complete front** in Polished Stainless with Slide Control. Also shown: Rich Oak Brompton mantel (3565K) from Stovax.

Logic™ Fires

There are three different fires in the Logic family to choose from: the Logic Hotbox, Logic Convector or the Logic HE. As well as benefitting from lower installation costs by choosing a Logic fire, additional savings can be made as these are all Reduced Draught fires, meaning that in most cases a wall or floor vent is not required. The Logic range is offered with a wide selection of frames and finishes; the full selection can be seen on pages 28 - 31.

Logic™ HE

Conventional Flue & Balanced Flue

The Logic HE features a glass front and boasts the highest efficiency of all the Logic Fires at up to 89%. The HE offers a choice of highly realistic log or coal fuel effects (1). With both conventional and balanced flue models, the HE is even suitable for homes without a chimney!

The Logic HE box draws cool room air into the bottom of the convection chamber (2) the cool air is warmed as it passes over the hot surfaces of the chamber. Hot air is then emitted back into the room via the top convection slot (3). Maximum heat is radiated into the room via the glass front (4), with most models featuring specially designed non-reflective glass. The Logic HE balanced flue, Coal-effect fires have been specifically designed with reduced depth to allow for easy installation into the internal skin of a traditional cavity wall. Logic HE Coal-effect conventional flue fires feature specially moulded coals for added ease of installation.

Balanced flue model shown.

#Not available to Logic HE Balanced Flue Coal-effect models

Log-effect

Coal-effect

Logic™ Convector

Conventional Flue

The Logic Convector open-fronted fire features a convection system that provides additional heat and efficiency to that of the Hotbox. Suitable for all chimney types, this realistic coal-effect (1) fire has the option of either manual or remote control. The convector box draws cool room air into the bottom of the convection chamber (2). The air is warmed as it passes over the hot surfaces of the chamber (3) and then emitted back into the room via the top convection slot (4).

Logic™ Hotbox

Conventional Flue

Suitable for all chimney types, the Logic Hotbox is an open-fronted fire with a realistic coal-effect fuel bed and a choice of manual or remote control options. The Hotbox draws cool room air into the bottom of the appliance (2) and then emits radiant heat into the room (3) via the glow generated on the ceramic fuel bed, for convenient and comforting warmth with all the ambience of a real open fire.

Image left : Logic HE Conventional flue fire with Coal-effect fuel bed, shown with Wave front in Matt Black and Arts2 frame in Brushed Stainless Steel with Slide control. Also shown: Malmö mantel from Stovax - available to UK Mainland only.

Logic™ Control Options

The Logic family* of fires are available with your choice of three different control options: manual control, slide control or, for absolute convenience, a remote control for the ultimate luxury heating experience.

Manual Control

An easy to use system that allows for ignition, extinguishing and full flame control all from a single control handle. To maintain the aesthetic appeal of your fire, the controls are discretely located behind the frame front at the bottom of the fire and can be accessed with ease.

Slide Control

Gazco's innovative Slide system has a subtly designed, ergonomic control that is situated on the top right hand side of the fire's frame for easy access. This easy reach lever offers complete and convenient control over the fire. Ignite or extinguish the fire as well as adjust flame height and corresponding heat levels to achieve the warmth and ambience you desire. Slide control Logic fires are available with a specific selection of frame styling options, please see pages 28 - 31 for details. Logic HE Conventional Flue Coal-effect slide control fires feature a new injection moulded control handle which is cooler to the touch.

Injection moulded control handle for Logic HE Conventional Flue Coal-effect fires shown above. Steel version for all other slide control models shown to the left.

Remote Control Options

Logic HE remote control fires offer complete convenience, allowing you to operate your fire from the comfort of your sofa. Your fire's remote control options will depend on which fuel-effect you choose. Coal-effect Logic HE balanced flue remote control fires come with our standard handset, which allows you to adjust heat output and flame height. For greater control, you can select the optional Programmable Thermostatic handset, which lets you thermostatically control the room temperature as well as scheduling your fire to switch itself on and off twice a day, once the pilot has been ignited.

Log-effect Logic HE fires and Coal-effect Logic HE conventional flue fires can be selected with our fully-sequential thermostatic handset. This advanced remote control allows you to ignite your fire and adjust the flame without getting up. This powerful control system can also set your Logic fire to maintain your preferred room temperature, if desired.

*Logic HE Log-effect is only available with Slide Control and Remote Control options.

Logic HE Conventional flue with Log-effect fuel bed and **Beat Front** in Matt Black with Slide control

Logic™ HE

Offering the ultimate marriage of traditional style and modern technology, Gazco offer realistic coal and log gas fires for the Victorian Cast Iron fireplaces manufactured by our sister company Stovax. This allows you to enjoy quintessential period charm yet also benefit from the added efficiency and convenience of a Gazco gas fire, complete with remote control if you wish. Please ask your retailer for details or visit www.gazco.com for more information.

To enjoy the added efficiency and economy of convected heat, there are several models in the Classic Fireplaces range that can be fitted with Gazco's Logic Convector fires as shown earlier in this brochure.

For further information and options please see the Logic technical information on pages 40 - 43.

*Logic models do not require additional room ventilation.

Your chimney type

The type of chimney or flue you have usually dictates your choice of fire. To help you establish which fires are suitable for your home, please use the information and pictures below to identify your chimney. Don't worry if you don't have a chimney though, you can still find the perfect fire for your home!

Conventional Flue CF

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney, pre-fabricated or pre-cast chimney system. Should your home have none of these at present, it is usually possible to have a pre-fabricated system installed in your home if required.

Brick or Stone Chimney
(Class 1)

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-Fabricated Flues
(Class 1 & 2)

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Pre-Cast flues
(Class 2)

Many modern homes have been built with such flues. You can readily identify them by either a metal flue cowl or a raised ridge terminal on your roof. Again, the natural circulation of heated air expels the products of combustion. Incidentally, these flues tend to be very shallow in depth so a slimmer fire is often required. Deep appliances, however, may be able to be installed with the use of either a spacer kit or deeper rebate on the fireplace. Please consult your Gazco retailer for further information.

Balanced Flue BF

Balanced flues work in conjunction with Gazco's Glass Fronted gas fires. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

Balanced Flue
(No chimney required)

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. The twin-walled pipe will exit horizontally through an external wall. No electric supply is required therefore there is no sound with this flue system.

No Air Vent required (UK)

Throughout this brochure, all fires shown with this symbol have the advantage of not normally requiring an air vent* where the air permeability is greater than $5.0\text{m}^3/\text{hr}/\text{m}^2$. Please discuss this in full with your local retailer.

*Requirements in the Republic of Ireland are different.

Logic HE Conventional flue fire with Coal-effect fuel bed with **Arts Front** in Matt Black and **Box Profil2 frame** in Polished Brass.

Technical Information

The information on the following pages is to assist you in your choice of a suitable Gazco inset fire. This is not intended to be all the information required to install your fire. This can be obtained from your local Gazco retailer or you can download the full installation instructions from the Gazco website at www.gazco.com.

ADDITIONAL INFORMATION FOR LOGIC™ HOTBOX & CONVECTOR FIRES

You can install a Logic Convector Fire with a Stovax Cast Iron Victorian, Art Nouveau or Combination Fireplace. Conventional Logic Hotbox and Logic Convector fires require 5" minimum flue sizes. Please consult your local retailer for further information.

Installation of Logic Hotbox or Logic Convector into Pre Cast Flues (minimum 16,500mm²)

Diagrammatic representation only. Not accurate for installation purposes.

If your chimney has a shallow 'starter block' then use spacer kit 8315 and a 3" (75mm) deep rebate surround to achieve the C1 dimension. Pre-cast flues with a deep 'starter block' may be installed in exactly the same way as a conventional masonry opening providing there is a depth of 8½" (215mm) at C1.

OPTIONS AND ACCESSORIES

8315	Spacer kit (75mm) for Logic Hotbox and Logic Convector

Important Information

Technical Specifications

All specifications given in this brochure are approximate. Actual specifications for each individual product will vary according to model. Your Gazco retailer will be pleased to provide any further information you require or you may view/download specification sheets from www.gazco.com

Installation and Safety

Gazco gas fires must be fitted by a qualified gas installer (GasSafe registered in the United Kingdom or RGII registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by viewing or downloading them from www.gazco.com

When designing your own installation, please also observe the minimum distance to combustible materials as stated in the installation instructions.

Please note that all parts of these fires, particularly the glass panel on certain models, become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

Servicing and Support

To keep your Gazco fire looking and performing at its best, it must be serviced annually.

This service must be undertaken by a GasSafe (Great Britain), CORGI (Northern Ireland) or Bord Gáis (Republic of Ireland) approved engineer and your retailer can organise this for you. Alternatively, Gazco offer a manufacturer's premium service with our friendly team of qualified engineers which can be booked at www.gazco.com/support

Air ventilation for gas fires

To comply with gas appliance installation regulations, all standard versions of the Classic Fireplace range require additional ventilation into your room. Please consult either your Gazco retailer or the Gazco Technical Information on our website www.gazco.com to confirm the ventilation required.

Colours/Flame pictures

Owing to variations in studio lighting & printing inks, the finishes/colours of fires illustrated in this brochure may differ slightly from actual models. Before purchasing, please ask your retailer to show you finish/colour samples. All flame pictures shown in this brochure are taken from real fires. Please note however that flame pictures will vary depending on flue conditions and surrounding geographical features. Some of the photography in this brochure may not comply with the requirement of the latest building regulations given as these are subject to constant change. You should always check you proposed installation arrangement with a qualified gas installer before proceeding.

Care and maintenance

Traditional materials, such as polished steel and brass, tarnish on contact with air especially when also exposed to heat. To help minimise this effect, we recommend fires receive regular treatment with suitable proprietary cleaners. Additionally, please remember that gas fires will require servicing annually by a qualified gas installer (GasSafe registered in the United Kingdom or Bord Gáis registered in the Republic of Ireland).

Warranty and product improvement

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas fire. This can be further extended to a Five Year Warranty, provided you register your product with Gazco. Fires purchased outside of Gazco's Expert Retailer Network will carry a standard Non-Extendable One Year Warranty, or minimum statutory warranty for your country. Please note these warranties are dependant on your appliance being serviced 12 months after installation and annually thereafter and excludes certain consumable parts. Full details of this warranty are available at www.gazco.com.

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations & amendments. Exact product details should be discussed with your retailer at the time of purchase.

Carbon Balancing

We are proud that we support the World Land Trust's mission to protect threatened habitats, by choosing Carbon Balanced Print in the production of the paper and print of the very brochure you are holding.

Riva2 Fires

In addition to the fires in this brochure, Gazco also offers the diverse Riva2 range, featuring a variety of fire sizes to fit almost any chimney opening.

Complemented by a wide choice of striking frames, mantels and lining options, this highly-realistic fire range can be perfectly tailored to your home's décor. Ask your local retailer for more information or download the brochure from www.gazco.com.

Riva2 EchoFlame Black Glass Lining

All fires in the Riva2 range can be selected with Gazco's inspiring EchoFlame Black Glass lining, which immediately enhances the depth and magic of the fire. Creating a dramatic, three-sided reflection of the dancing flames, this stylish lining creates a visual centrepiece that leaves a lasting impression.

Also available from Gazco

Logic2 Electric Box Profil with Highlight Polished fret & Brushed Steel effect frame.

Gazco Electric Fires and Stoves

In addition to the wide selection of gas fires shown in this brochure, Gazco also offers an extensive range of highly realistic, stylish electric fires which are covered in separate dedicated brochures. Whether you want to achieve a modern contemporary look or a more classic, traditional interior, Gazco's electric fires and stoves brochures have the perfect solution whatever your style or budget.
